Group #4

Plans for Iteration 3

Group Member	Task for Iteration 3
Farbod Abbaskhanidavanloo	- Revision of previously submitted use case descriptions (if needed). - Revision of previously submitted sequence diagrams (if needed). - Two new sequence diagrams (to match the two new use case descriptions, trace all paths). - Collaboration with coding for second minor release.
Apurba Sinha	- Revision of previously submitted use case descriptions (if needed). - Revision of previously submitted sequence diagrams (if needed). - Logical architecture diagram. - Collaboration with coding for second minor release.
Trent Hancock	- Revision of previously submitted use case descriptions (if needed). - Revision of previously submitted sequence diagrams (if needed). - New fully dressed use case description (Make a Move). - Collaboration with sequence diagrams. - Collaboration with coding for second minor release.

Jesse Hanlon	- Revision of previously submitted use case descriptions (if needed). - Revision of previously submitted sequence diagrams (if needed). - Collaboration with use case descriptions. Initialization of coding for second minor release.
Matthew Keough	- Revision of previously submitted use case descriptions (if needed). - Revision of previously submitted sequence diagrams (if needed). New fully dressed use case description (Make a Bid). - Collaboration with sequence diagrams. - Collaboration with coding for second minor release.

- NOTE: tasks shown in green will be done individually first and then checked with the rest of group members to receive feedbacks for correction.
- NOTE: tasks that have the world **collaboration** in them (tasks written for more than one individual group member) will be done as a team during our group meetings.
